IOTA Contest 2024

Next weekend (July 27-28) sees the IOTA contest taking place; it's one of the more popular contests in the calendar year. To keep track of participating island stations or to add your entry check [here](#) and [here](#). Generally, a week before the contest, the ADXO page updates daily. The rules are [here](#).

3X Guinea 2024 DXpedition by the F6KOP team-cancelled

We were honest and transparent in announcing our expedition to Guinea within a reasonable time-frame, 4 months before departure.

However, some other teams remain silent until the last moment and reveal their plan only when they feel compelled to do so.

Under these conditions, we work for months on a project without knowing that others are doing the same thing which is totally unproductive because going to the same DX place 2 months apart does not make any sense. Should we, as is becoming fashionable, unveil a project more than a year in advance to "close the door" or to "book"? We do not think so. On the other hand, it would be wise for teams who leave regularly to be able to communicate preventing others to work for nothing, but this is probably a dream because some people have too much taste of secrecy.

VK2/W7BRS Lord Howe Island -update

UPDATES regularly appear on the VK2/W7BRS [blog](#) – In addition, Club Log Livestream is now active – check [here](#).

Been operating almost a week since the equipment finally arrived. I think I started rolling sometime last Friday maybe, I cannot remember.

At any rate, the number of Q's in the log is really low and I believe part of the reason is the fact VK2 as a prefix does not sound like Lord Howe Island. Despite the official rule changes, the Lord Howe Island prefix of VK2 does not register with people.

MM0UKI Flannan Islands EU-118 -update

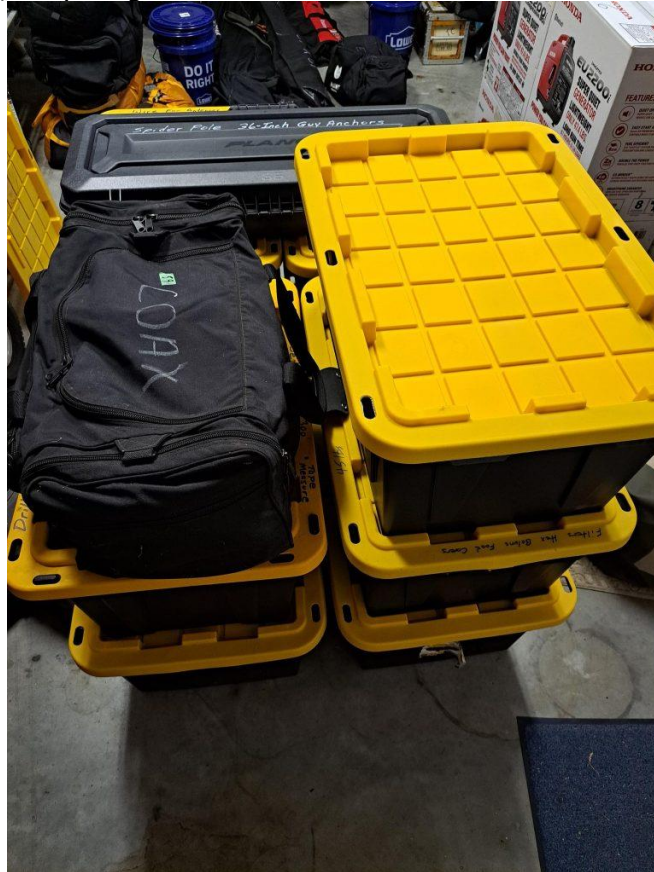

John, G4IRN - one of the MM0UKI team members - recently gave a presentation on the upcoming activation of IOTA EU-118. Check it out below.

CY9C St Paul Island -update by Lou N2TU

'The packing continues! Here is a portion of the gear getting ready for transport to Nova Scotia. Team Co-Leader Murray, WA4DAN is arranging the loads for the helicopter 'slings'. All equipment and personnel will be transported to St. Paul via helicopter. Personnel will not ride in the slings!....(smile!) Only the equipment, thank goodness! Although riding in a 'sling' under an helicopter would be a first! This is a very expensive method of moving equipment and personnel

from the mainland, but absolutely necessary as there is no viable water landing area. As mentioned a few weeks ago, get your personal station ready. This will probably be the last St. Paul operation for a very, very long time.'

N5J Jarvis Island DXpedition –update about the antennas

[V8] A small, 25-foot tall vertical with two elevated counterpoises fed by an automatic tuner for 40 to 10 m. N6BT design.

[V9] Dual Band 40/20 m Antenna: This antenna has two vertical wires that resonate at 7 and 14 MHz. Two sets of elevated radials make this antenna somewhat ground independent.

[V10] A 38-foot vertical, fed via an automatic tuner that covers 80 to 10 m. The antenna uses salt-water for ground. Based on the DXEngineering ATK65A kit.

[V11] 45-foot vertical fed via an automatic tuner that covers 160 to 10 m. Based on the DXEngineering ATK65A kit. This is a "bird-friendly" 160 m antenna that we hope will provide good enough performance despite it being only 1/12 of the wavelength (instead of 1/4). The V8 and V9 antennas do not require a ground. Both the V10 and V11 have large aluminum bases that stand in or near salt-water and connected to the salt-water for an almost perfect ground. No radials.
